01 / WHO WE ARE

Welcome to our company

Thank you for taking the time to learn more about AMT Mechanical Services LTD. This pack introduces our services, how we work and the people to contact when you need support.

We understand the pressures of manufacturing environments and the impact of unplanned downtime. We provide industrial machinery maintenance, repair, installation and refurbishment, with practical engineering support shaped around your equipment and priorities.

Based in Epworth, North Lincolnshire, we support customers across the UK. Our aim is to build long-term working relationships through honest advice, dependable service and quality workmanship.

Our values

Safety first

Safety is central to how we plan and carry out our work.

Quality workmanship

We take pride in practical, well-executed engineering work.

Reliability

Dependable service and professional completion of the agreed work.

Integrity

Honest advice and transparent communication.

Customer focus

Support shaped around your operational requirements.

Industries we support

+ Foundries
+ Steel manufacturing
+ Surface finishing
+ Shotblasting operations
+ Automotive
+ Aerospace
+ Defence
+ General manufacturing
+ Heavy engineering
+ Fabrication
+ Recycling facilities
+ Industrial processing plants

02 / MACHINERY RELIABILITY

Maintenance and breakdown support

Preventative maintenance

Planned maintenance helps identify wear, reduce unexpected breakdowns and support the life of industrial equipment.

- Planned servicing
- Mechanical inspections
- Equipment health checks
- Lubrication
- Mechanical adjustments
- Wear monitoring
- Maintenance reporting
- Planned shutdown support
- Maintenance scheduling

Maintenance benefits

- Reduced downtime
- Lower repair costs
- Longer equipment life
- Improved productivity
- Better reliability
- Improved safety

Reactive breakdown support

Mechanical fault diagnosis and repair support to help return machinery safely to operation. Contact the team to discuss your fault and current availability.

- Mechanical fault diagnosis
- Component replacement
- Gearbox repairs
- Bearing replacement
- Drive system repairs
- Machinery testing
- Return-to-service inspections

Service contracts

Maintenance agreements tailored to your equipment and operational requirements.

- Planned maintenance visits
- Maintenance reports
- Asset condition monitoring
- Support to reduce downtime
- Improved equipment reliability
- Predictable maintenance costs

03 / EQUIPMENT AND SITE CHANGES

Installation and machinery moves

Machinery installation

Mechanical installation of new and refurbished industrial machinery.

+ Machinery positioning
+ Mechanical installation
+ Alignment
+ Levelling
+ Commissioning
+ Operational testing
+ Site acceptance support

Industrial property clearance

Clearance support for factories, workshops and manufacturing facilities.

+ Machinery removal
+ Plant decommissioning
+ Workshop clearance
+ Equipment disposal
+ Site preparation
+ Asset removal

Machinery removal and relocation

Support for moving equipment within a facility or between sites.

+ Machine dismantling
+ Safe removal
+ Transportation coordination
+ Reinstallation
+ Mechanical alignment
+ Commissioning
+ Operational testing

04 / SPECIALIST MACHINE SUPPORT

Shotblast machinery and spare parts

Shotblast machine specialists

Maintenance, repair and refurbishment of shotblast equipment and its associated systems.

+ Preventative maintenance
+ Reactive repairs
+ Wheel assembly repairs
+ Wear liner replacement
+ Blast wheel servicing
+ Abrasive recovery systems
+ Bucket elevators
+ Screw conveyors
+ Dust collection systems
+ Performance improvements

Dust collector maintenance

Servicing and repair support for industrial dust collection equipment.

+ Filter replacement
+ Fan maintenance
+ Duct inspections

Spare parts supply

Customers can order industrial spare parts through AMT Mechanical Services LTD. Send machine details, part numbers if known, quantities and photographs so we can discuss your requirements and confirm availability.

+ Bearings
+ Motors
+ Gearboxes
+ Hydraulic components
+ Pneumatic components
+ Belts
+ Chains
+ Wear parts
+ Shotblast machine components

05 / MECHANICAL AND ELECTRICAL CAPABILITY

Systems and workshop services

Hydraulic services

Fault finding, maintenance and repairs for industrial hydraulic systems.

- Hydraulic fault finding
- Cylinder repairs
- Hose replacement
- Pump replacement
- Valve replacement
- Hydraulic servicing
- System inspections
- Leak diagnosis

Fabrication and welding

Practical fabrication and welding support for industrial operations.

- Welding repairs
- Machine modifications
- Safety guards
- Platforms
- Pipework
- Equipment repairs

Pneumatic services

Maintenance and repair support for compressed air systems.

- Pneumatic diagnostics
- Air cylinder repairs
- Valve replacement
- Airline repairs
- Air preparation units
- Pressure testing
- Fault finding

Electrical services

Industrial electrical support alongside our mechanical services.

- Electrical fault finding
- Machine wiring
- Motor replacement
- Control systems
- Electrical testing
- Commissioning support
- Industrial electrical repairs

06 / SAFETY AND QUALITY

Crane support and safe working

Overhead crane services

Maintenance and repair support to help keep lifting equipment operating safely and reliably.

+ Mechanical maintenance
+ Electrical maintenance
+ Breakdown repairs
+ Fault diagnosis
+ Component replacement
+ Planned servicing
+ Refurbishment support

Health safety and quality

Safety forms part of every project. We work with customer site procedures and requirements, with a focus on:

+ Safe working practices
+ Quality workmanship
+ Continuous improvement
+ Environmental responsibility
+ Professional conduct

Health and safety consultancy

Practical support for machinery safety, site requirements and safe systems of work.

+ Risk assessments
+ Method statements and RAMS
+ Machinery safety advice
+ Site inspections
+ Compliance guidance
+ Safe systems of work

Why work with us

+ Experienced engineers
+ Responsive engineering support
+ Quality workmanship
+ Honest advice
+ Reliable communication
+ Flexible engineering support
+ Specialist industrial knowledge
+ Long-term maintenance solutions
+ Customer-focused service

07 / YOUR NEXT STEP

Working with us

Our process

01 Understand your requirements

An initial discussion about your equipment, priorities and the work required.

02 Assess the equipment

A site visit and equipment inspection, as appropriate to the job.

03 Agree the work

A quotation and recommendations for the proposed scope.

04 Complete the work

Engineering work carried out in line with the agreed arrangements.

05 Test and hand over

Testing, commissioning and handover as relevant to the work.

06 Plan ahead

Ongoing support and future maintenance planning.

Start with an enquiry

To help us understand what you need, please share:

- Your company name and site address
- Your main contact details
- Machine make, model and serial number, if known
- A description of the work or fault
- Part numbers and quantities for parts enquiries
- Photographs, maintenance history and your preferred timescale

The scope, timing, pricing and site arrangements for each job are agreed separately with our team.
